Objective

Software Engineering student at Zewail University with hands-on experience in application development, backend development, MVC architecture, and relational databases. Seeking a software engineering internship to apply skills in Python, C#, SQL, and full stack development in real-world projects.

Education

University of Science & Technology at Zewail City, School of Computer Science & AI
Bachelor of Science in Computer Science

Giza, Egypt

Expected: June 2028

Technical Skills

Languages:

Python, C++, C#, SQL, Assembly (Basics)

Web & Application Development:

Full Stack Development, MVC, Backend Logic, CRUD Operations, Authentication, Razor Pages, HTML, CSS

Databases:

ERD, Relational Databases, SQL Queries, Constraints

Concepts & Tools:

OOP, Data Structures & Algorithms, Design Patterns (MVC, Singleton, Repository), Git & GitHub, Visual Studio, VS Code

Professional & Academic Experience

Junior Teaching Assistant (JTA) – Digital Logic & Design – University of Science & Technology at Zewail City
Oct 2025 – Jan 2026

- Assisted 100+ students with digital logic projects, assignments, and technical problem solving
- Explained technical concepts to enhance student understanding.

Key Projects

EduTrack – Web Application (Python Flask, MVC)

- Developed a full MVC-based web application to enhance student-teacher interaction
- Contributed to backend logic, controllers, models, and database integration
- Implemented grading, attendance tracking, performance monitoring, and real-time chat features

Smart City Traffic Management System (C++)

- Implemented an event-driven traffic simulation using custom data structures (no STL)
- Managed vehicle prioritization, accidents, rerouting, and performance statistics

Vita Code – Medication Management System (Python)

- Developed a modular desktop application using Python and CustomTkinter
- Implemented medication search, alternatives, price comparison, and categorization features

DB-PHARMACY – Pharmacy Management System (C#, MVC)

- Developed a multi-role system with authentication and role-based access control
- Contributed to database design, inventory management, and transaction handling

Speedy Rent – Car Rental Management System (C++)

- Built a text-based system for managing cars, customers, bookings, and payments
- Applied OOP, file handling, and modular project structure for clean code

Software Engineering & Other Skills

- Software Requirements Specification (SRS), Use Case Diagrams, Project Analysis & Design
- Project Management Fundamentals (Planning, Scheduling, Team Coordination)
- Basic Hardware & Digital Logic Projects

Languages

Arabic: Native | English: Upper-Intermediate to Advanced (B2–C1)
